

Sycor.Plastics

The SAP Business All-in-One solution for the plastics industry.

The fully integrated SAP solution for small and medium-sized plastics processors.

For medium-sized businesses in the plastics industry, *Sycor.Plastics* is the ideal SAP industry solution for domestic and international use. *Sycor.Plastics* maps all your company's business processes in a single system.

Today, plastics processors routinely face growing pressure from competitors at home and abroad, the demanding quality requirements of their customers, increasingly complex production processes and changing regulatory frameworks.

To help you tackle these challenges, we have used our long-standing experience with mid-sized companies in the plastics industry to develop a SAP industry solution for national and international use that maps all your business processes: *Sycor.Plastics*, our fully integrated ERP solution based on SAP Business All-in-One. In addition to the standard range of functions, your industry-specific processes and requirements are preconfigured in this compact solution. For example:

- Make-to-order production based on variant configurations, or make-to-stock production
- Serial number/batch management
- Intercompany business and subcontracting
- Tool management
- Quality management
- The *Sycor.ProductionCockpit* and the *Sycor.OrderCockpit*.

You can improve process and planning reliability by mapping your entire value-added chain in *Sycor.Plastics* and using its comprehensive reporting functions. Thanks to a wide range of functions and seamlessly integrated data, all your processes will interact smoothly. This will enable you to provide more efficient services and boost customer satisfaction while simultaneously controlling all your costs.

Sycor.Plastics fully maps the areas of development, purchasing and production, sales and shipping as well as accounting on a single platform.

You can coordinate logistics processes across departmental lines. Comprehensive functions simplify your procurement processes, such as preplanning for determining necessary resources, materials planning using MRP or consumption-based techniques, quality control, order tracking and vendor evaluations.

Your advantages:

- Excellent security of investment
- Short implementation times with practice-oriented training concepts
- Mapping of the entire value-added chain
- Transparent view of all key performance indicators
- Optimal IT support for your business strategy

Your challenges:

- Intense competitive and pricing pressures
- Complex production planning
- Demanding quality requirements
- Growing planning and reporting requirements due to regulatory guidelines
- Demand for long-term increase in company value

Place your trust in business software that is easy to implement, flexible and tailored to your company.

Sycor.Plastics offers special functions for the complex production planning and control requirements of plastics processors. Routine challenges include minimizing lead times and adhering to deadlines while optimizing capacity utilization, as well as optimizing preproduction costs (with regard to the color sequence or measurements) and the inventory situation. You can create a production plan that takes into account available material, delivery deadlines as well as available workforce and machine capacities. Batch number and serial number management are both supported.

The *Sycor.ProductionCockpit* is the central tool for work schedulers and production planners. It offers functions such as characteristics-dependent sequence/campaign planning, integrated tool management, capacity overviews and alert functions. The solution features an intuitive user interface with a layout that can be customized to meet the user's needs. At a single glance, your employees can view the production status, plan campaigns and sequences more quickly and

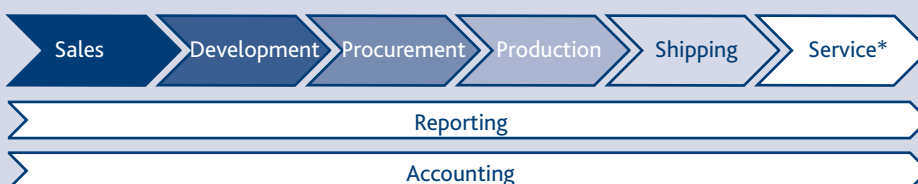

directly access the customer order or the stock/requirements situation. The integrated shop floor control feature can be used to determine the status of current production processes. In this way, your employees can assess the current situation at any time and quickly adjust plans.

Sycor.Plastics offers practice-oriented sales and shipping processes that let you process orders quickly and boost customer satisfaction. Comprehensive functions for cross-system exchange of data via electronic data interchange (EDI) are available. Developed by Sycor, the *Sycor.OrderCockpit* facilitates the creation of quotations, orders and invoices. A traffic light feature allows you to view the delivery status of all orders at a glance and perform a variety of actions, such as processing deliveries or invoices, without changing screens. We also offer custom solutions for mobile data entry (*Sycor.MobiDel*) that can further optimize your internal logistics processes.

Sycor.Plastics offers more than just impressive industry-specific functionality. This SAP Business All-in-One solution is based on the latest version of SAP ERP and can be seamlessly integrated into your business processes. *Sycor.Plastics* also offers a high level of security for your IT investments, short project implementation phases thanks to preconfiguration, and employee training right from day one.

Supports the following business processes and software functions:

- Integrated development processes, model processing and change management
- Document management for internal and external documents
- Tool construction and management, shot counts
- End-to-end sales process, enhanced by *Sycor.OrderCockpit*
- Comprehensive functions for preliminary and final costing enable continuous cost controlling
- Mapping of make-to-order and make-to-stock production scenarios
- Characteristics-dependent sequence planning for production
- *Sycor.ProductionCockpit*
- Comprehensive planning and MRP procedures
- Integrated procurement processes including vendor evaluations
- Quality management processes and batch processing across the entire supply chain
- G/L accounting, accounts payable and receivable accounting, asset accounting
- Freely customizable, real-time business reports

*optional offer

Business advantages:

- Transparent view of all key performance indicators
- Preconfigured industry-specific processes ensure a high level of planning and process reliability
- Lean, automated processes ensure shorter lead times and faster rollouts
